Service & Charging Principles

Cameron Intellectual Property is a European IP boutique practice with a reputation for quality, flexibility and responsiveness.

We take a proactive approach to helping our global client base and their outside counsel get the best out of the UK and European IP systems.

Although we can handle the full spectrum of technologies, we have particular strengths in the fields of engineering and software, with extensive experience of the energy & renewables, medical & dental technologies, electromechanical, packaging and food and drink sectors.

We have efficient systems managed under our ISO 9001 accreditation for quality management and are able to service clients in a very streamlined manner – administrative-type activities, such as filing are priced accordingly, while substantive tasks, involving attorneys time are fairly priced at a level reflecting the complexity and time involved.

We are able to offer flexibility in pricing and are happy to invest time in dealing with enquiries and offering general advice and guidance.

The attached fee schedule provides an overview of our standard service charges. However, we can flex our service levels and fees in accordance with the particular needs of any of your individual clients.

This can, for example, include volume-based discounts, fixed or capped charges. We are also very happy to discuss bespoke arrangements to suit individual requirements.
